REPORT
OF THE
SUPERINTENDING SCHOOL COMMITTEE
FOR THE YEAR ENDING
MARCH 12, 1866.

DISTRICT NO. 1.

This school, two departments, has had three terms in each, of 10, 6, and 11 weeks.

Mrs. Taylor has had the care and instruction of the smaller scholars with her former marked adaptedness for her work. She has, with few interruptions, had the care of this department of the school for 12 years and desires the Superintending Committee to record her grateful acknowledgement to the District for their so long continued and favorable regard.

The Summer and Fall terms in the department of the larger scholars were taught by Miss Maria P. Johnson. The school appeared well under her management.

The Winter term of 11 weeks was under the instruction of Mr. Wm. H. Downing. A well qualified, faithful and energetic teacher and disciplinarian. Many in this department of larger scholars have made commendable progress; while the many marks for absence and tardiness blackening the Register, show why others have not; and furnish the reason why this school, with superior advantages, falls behind several others less favored.

Whole number of scholars 92.

DISTRICT NO. 2.

In this District there has been only one term of 5 weeks; taught by Miss Ella A. Webster, with very good success.

Whole number of scholars 6.

This school had two terms, a Fall term of 10 weeks, and a Winter term of 9 weeks, both taught by Miss Henrietta M. Bridgman. DISTRICT NO. 18.

This school had one term of 10 weeks, Miss Georgianna Harris, teacher. Miss Harris taught this school last year. Under her management and instruction it has made very commendable progress.

Whole number of scholars 10.

Our schools the past year have been under the instruction and management of 28 different teachers, 2 males and 26 females. Whole number of weeks schooling 331. Whole number of scholars 392.

These schools, in the main, have been well managed and faithfully taught. The three highest in grade are Nos. 5, 17 and 4.

Under good management and faithful instruction by well qualified teachers, with few exceptions, our schools have been taking an advanced standing.

Too much time had been spent in reviewing what had been gone over the previous term. This was easy to the scholar.

He made but little effort, and there was but little advance term after term. The mind did not labor in pressing onward. Indolent habits of study and little progress was the result from year to year. The aim has been, for two or three years past, to press the classes through their Geographies, Arithmetics, &c., and proceed so thoroughly that they can commence in each term nearly where they were at the close of the previous term; whatever reviewing is done, being done near the close of the term. Hence, our advanced scholars are now in Algebra, Physiology, History, &c. instead of remaining in the more common branches of study.

Our schools are now very well supplied with Text-Books, and those of a very good character. When parents purchase new books, let them be careful to procure such as are recommended in this Report, and they will secure such an uniformity as will promote the better classing of the school.

The books recommended are : Town and Holbrook's Progressive Readers and Spellers ; Weld and Quackenbos' Grammar ; Adams' Arithmetic, Greenleaf's National, Colburn's, and Emerson's ; Quackenbos' History of the United States, small and large ; Colton & Fitch's Geography ; also, Cornell's Geography is approved ; Cutter's Physiology ; Davies' Algebra.

BEZALEEL SMITH,

SUPERINTENDING COMMITTEE.
